

PROJECT MANAGEMENT DELIVERY MODEL

No matter the nature of your IT assignment, you expect every project manager you work with to be focused on quality and obsessive about budgets and timelines. At Sparkhound, whether we're implementing highly technical details or working toward broader project objectives, we're also facilitating communication, teaching your team how to leverage the solution and thinking longer-term about the outcomes you expect beyond project completion. That's the difference between a task-driven player and a true steward of your business.

OUR VALUE PROPOSITION

Our Sparkhound Assessment Model (SAM) approach to developing an IT Strategy and PMO process maturity offer several key advantages to reduce your long-term business risk:

- Access consulting talent with Professional Scrum Master (PSM), Certified Scrum Master (CSM), Certified Associate Project Manager (CAPM) and Project Management Professional (PMP) certifications
- Achieve buy-in from key stakeholders on project direction for business alignment, user governance and change management adoption
- Manage budget, milestones, resources and cross-organization communications to maximize the desired return on investment, remove roadblocks before they occur, minimize business interruption and create long-term business impact
- Reduce IT administrative burden with ongoing management, monitoring and administering of your application with Sparkhound's Managed Services Team

PROJECT MANAGEMENT DELIVERY MODEL

ENVISION

Using our Sparkhound Assessment Model (SAM), our consultants bring technical expertise and business acumen to the table, collaborating with your **People** to assess your **Processes** and **Technology** so you get the most from your investment.
